

Because the future  
is bright

SPCP Serie  
**PHOTOVOLTAIC  
CARPORT**

For level 2 and 3 charging stations

# A SOLUTION FOR GREEN MOBILITY

Smart management

## Flexibility

- Energy autonomy (100 % solar or hybrid)
- Little to no modification of the building's main electrical entrance

## Economy

- Reduces cost of consumption and electrical power
- Eliminates or reduces the need for gasoline generators

## Durability

- Climate resistant
- Protects vehicles and users from the sun and weather
- Estimated life of the structure (50+ years) and PV modules (30+ years)

## Warranties

- 5-year global limited warranty
- 12-year PV module limited warranty
- 30-year performance warranty  
Maximum reduction of 2% in the first year and 0.45% in subsequent years

## Configuration

- Modular construction and design
- Adapted to different needs
- Supports level 2 and 3 charging stations

## Installation

- Turnkey project
- Punctual works without interruption of services
