### General usage tips

- Don't place any objects between your device and the portable charger.
- To ensure more efficient wireless charging, you have to remove the protective case from your device.
- Position your device on the portable charger according to the exact location of your device's wireless charging receiver.
- To charge the portable charger, place it so that the solar module is facing the sun or plug in the USB cable to a compatible power source.
- Be sure not to exceed the maximum recommended USB cable length for your device. The length and quality of the USB cable can affect charging speed and performance.

### Overview

**NOTE :** Images shown are for illustration purposes only. Actual product may vary due to production improvements.

### Instructions

**NOTE :** For best performance, make sure the XPC20 is fully charged. The XPC20 is pre-charged to 50% when delivered, but depending on certain factors, it may become discharged during transport.

To start using the XPC20, press once on the power button located on the side of the device. The green indicator light will illuminate to confirm that the recharge is functional.

1. For wireless charging, place your device on top of the wireless charging pad. The indicator light will flash to confirm that charging is in progress. Adjust the positioning of your device so that the charging process is optimal. When charging is complete, your device will indicate that the battery is full.

2. For charging with one of the built-in output cables, insert the end that matches your device's connection port. When charging is complete, your device will indicate that the battery is full. Disconnect by removing the used cable.

3. To charge your device with a non-integrated cable, insert one end into a compatible output port on the portable charger and the other end into your device. When charging is complete, your device will indicate that the battery is full. Disconnect by removing the used cable.

4. To use the LED flashlight, press and hold the power button for 3 seconds. To turn it off, press and hold the power button again for 3 seconds.

Charging time may vary depending on power consumption and age of the battery. The LED status indicator shows the battery level of the charger.

### Maintenance

A soft, damp cloth can be used to clean the XPC20. Don't use excessive water or any other type of cleaning solvent and never immerse your device in water. Note that salt air can cause corrosion of connectors, ports and other metal components.

### Safety information

- Don't use this device for anything other than its intended use.
- Keep the device away from moisture, water or any other liquid.
- Don't use the unit if it is wet to avoid electric shock and/or personal injury and damage to the unit.
- Don't use the unit if it is damaged.
- Don't attempt to repair the device yourself.
- Never use a damaged or defective USB cable for charging, as this may damage the damage the portable charger and your device.
- Keep the device out of reach of children.

### Warranty

The XPC20 portable charger is warranted against manufacturing defects for 12 months from the date of purchase. Please retain your receipt as proof of purchase. This warranty is void if the product is found to have been damaged or used for any purpose other than that intended.

### Environmental recycling policy

The XPC20 contains a lithium polymer battery. Lithium polymer batteries are environmentally safe when fully discharged. The device should not be disposed of in household waste.

By purchasing the XPC20 portable charger, the customer assumes the obligation to handle waste electrical and electronic equipment (WEEE) in accordance with environmental regulations for waste disposal. Please refer to local and national laws for battery disposal procedures.
